

Creating print ready PDFs from Mac Word 2008

It is very easy to create print ready PDFs for text only books using Mac Word 2008.

When you are ready to create your PDF then simply go to File / Save As... and choose PDF from the drop down list to the right of the Format box.

And that is all there is to it!

Once you have created the PDF then do a quick check just to make sure that fonts are all embedded. Open the PDF file and go to File / Properties and then the Fonts tab and make sure the words (Embedded Subset) are to the right of the font names.
